

About Bluefrog POS

Bluefrog POS is a company that specialises in Point of Sale (POS) systems that cater for the individual needs of many businesses; by providing financial control, workflow efficiency and cost savings.

With a list of award winning clients and a reputable history of service and innovation within the hospitality industry, Bluefrog POS is rapidly becoming the Point of Sale provider of choice.

“Our staff have created a system that has stood the test of time, through continuous research, development and innovation. More importantly the system is exclusively owned and developed by us giving us greater scope for development and customisation for our clients needs.

As a POS provider, we know we are leading the market which combines functionality, reliability and aesthetics. This is one of the reasons why many businesses which have previously used our competitors are now changing over their existing system to a Bluefrog POS system. With our thorough research and testing we have sourced hardware designed to withstand the harsh environments of the hospitality industry, whilst meeting the aesthetic needs of your business from an interface and design point of view.

With any installation of a Bluefrog POS system, we provide full training therefore making the transition to our system completely smooth for you and your staff.

Our support is personalised and is available within the hour, on-site support from 8am-10pm, 7 days a week giving you peace of mind - always!

Bluefrog POS; keeping you in touch with your business.
